

Fully insulated MobyDos Container

Option Code: [-CONT-ISO-]

Fully insulated, hot-dip galvanised container as weather protection for control cabinet and flocculant dosing unit.

Function

The heated, fully insulated and lockable container protects against frost, weather and vandalism. Tools and wear parts can also be stored safely.

The trace heating for the flocculant hose ensures a reliable feed of the temperature-sensitive flocculant into the feed pipe of the wheel washing system, even in winter.

Technical description

Hot-dip galvanised, fully insulated and lockable container made of a profile frame and beaded sheet metal, solid wooden floor and interior lighting. Preinstalled supports for control cabinet and flocculant dosing system, including 15 metres of trace heating for the flocculant hose. Thermostat for heat regulation in the container.

External emergency OFF switch for the washing system.

Specifications

• Dimensions (H×W×L)	220×220×225 cm
• Material	Hot-dip galvanised steel
• Weight	480 kg
• Connection value	1.0 kW
• Length of trace heating	15 m

General scope of supply

- Fully insulated, lockable MobyDos Container
- External emergency OFF switch
- Support for control cabinet
- Support for flocculant dosing system
- Heating with thermostat
- Interior lighting
- Cable guides
- Trace heating for flocculant hose
