

MobyDos Container

Option Code: [-CONT-]

Hot-dip galvanised, lockable container as weather protection for control cabinet and flocculant dosing unit.

Function

The lockable container protects against weather and vandalism. Tools and wear parts can also be stored safely.

For temperatures that regularly fall below freezing, we recommend the optional *fully insulated MobyDos Container*.

Technical description

Hot-dip galvanised, lockable container made of a profile frame and beaded sheet metal with insulated roof, solid wooden floor and interior lighting. Preinstalled supports for control cabinet and flocculant dosing system. Thermostat for heat regulation in the container.

External emergency OFF switch for the washing system.
