

# Hot-dip galvanised side walls

Option Code: [-SIWA-]

Side walls and nozzle bars in hot-dip galvanised finish.

## Function

Side wall elements and side nozzle bars in weather-resistant, durable steel design instead of PVC.

Ideal for long-term, stationary applications where the advantages of lightweight PVC (easy assembly and repair) are less relevant.

Optional *third nozzle tube* in hot-dip galvanised version on request.

## Technical description

Hot-dip galvanised side wall elements with painted holding devices in Traffic blue (RAL 5017). Two double, hot-dip galvanised side nozzle bars with quick couplings and individually adjustable brass nozzles.

## Specifications

### Side wall elements

- Dimensions (H×W) 130×200 cm
- Material Hot-dip galvanised steel

### Support

- Material Steel
- Colour Traffic blue (RAL 5017)

### Side nozzle bars

- Material Hot-dip galvanised steel
- Number of nozzles/side 17
- Nozzle material Brass
- Nozzle Ø 8 mm

## General scope of supply

- Side wall elements
- Retaining devices
- Side nozzle bar with brass nozzles
- Brass nozzles individually adjustable
- Nozzle bar adapter
- Mounting material
