

Recycling tank 50B

Art. no. —

Painted steel recycling tank.

Illustrations may differ from the actual scope of delivery

Function

The washed-off solids settle out in the recycling tank. The recycling tank is cleaned with an excavator or a pump truck.

Technical description

Recycling tank consisting of a solid steel structure with profile frame ($\frac{3}{4}$ in) and steel plates. Surface treatment by chemical cleaning, primer 2.4 μ m and top coat 2.4 μ m Traffic blue (RAL 5017). Two drain covers for easy emptying of the tank. The tank construction allows it to sustain all the forces generated by a passing loaded truck even when empty.

Specifications

- Dimensions recycling tank (H×W×L) 65×87×457 in
 - Weight (ready to ship) * 8,200 lbs
 - Material Steel
 - Color Traffic blue (RAL 5017)
- * in accordance with "Technical description"

General scope of supply

- Recycling tank
- Additional components dependent on recycling tank design, for example: overflow partition with sieve insert, baffle, level control, rim elevations, tank connections
